

Data ~ The Road to Making a Difference!

Calling all Special Education Providers (Elementary and Secondary)!! Come and learn how to look at data differently. During this two-day class, you will encounter firsthand what your students are experiencing through a Dyslexia Simulation, receive strategies and tools for progress monitoring, learn how to drill down to the root cause of problematic concerns (academic and behavior), get access to digital make and take forms to monitor and graph student progress (i.e. individual, small group, caseload, and classroom), collaborate and network with colleagues as we take a deeper dive into data to what the data is really telling us, dissect sample student data from academic areas and behavior concerns at all age levels (elementary through secondary) as well as the chance to look at your own data from this past year. This training will be interactive and will be filled with lots of tools and strategies that you can take and use next fall. Please bring a laptop computer.
