Introduction to Artificial Intelligence (AI)
The Introduction to Artificial Intelligence course is designed to provide teachers with a comprehensive understanding of the foundational concepts, techniques, and applications of artificial intelligence (AI). Participants will embark on a journey through the captivating realm of AI, exploring its historical evolution, theoretical underpinnings, and practical implications. Through engaging discussions and hands-on activities, educators will gain insight into the diverse facets of AI and its relevance in the educational space. By the end of the course, teachers will emerge with a robust comprehension of AI fundamentals, empowering them to navigate the dynamic landscape of artificial intelligence and contribute responsibly to its development and ethical implementation.
