

Data Driven Instruction Table Talks

Beginning September 6, 2023, CBOCES will offer online “Data Driven Instruction Table Talks,” every other week, for twelve weeks. During the off weeks between trainings, teachers will have access to **Office Hours** where individual teacher needs can be met.

Teachers will learn Data-Driven Instructional approaches to analyze, diagnose, prescribe, treat, provide follow-up, plan for, and evaluate lessons to drill down and address root cause issues affecting student achievement. Teachers will receive practical information, valuable resources, and usable strategies to implement immediately in their next day instruction. During this twelve-week period, teachers will bring data of three “at risk” students to the group. They will be given time to learn new processes and collaborate with colleagues as they analyze three of their own students’ data to determine the root cause of their students’ issues, develop a treatment plan with next steps for instruction and assessment necessary to increase student achievement toward the desired objective/s.

Learn the process, then study individual students to determine diagnosis, prescription, treatment and follow-up while teaming with other teachers to provide support and expertise.

Trainings on Wednesdays, 4:30-6:00 pm
