

Workshop: AI in Education – Practical Skills for Teachers and Administrators

Join us for a hands-on workshop exploring how AI can transform education! This session will help educators build foundational AI literacy, discover practical classroom applications, and learn how to evaluate and implement AI tools effectively. Topics will include AI basics, ethical considerations, productivity tools, and lesson plan creation. Participants will engage in collaborative activities, explore real-life scenarios, and leave with actionable strategies and resources to enhance teaching and learning.

Small group and individual work will be supported throughout this day-long workshop.
